

# TempTrust™ EPS Insulated Shipping Containers

## Quick Reference Card

LF & WF EPS coolers are produced from molded expanded polystyrene to provide economical, tough - lightweight protective packaging - ideal for mailing or shipping. Packaging is non-abrasive, non-corrosive, energy absorbent, and will not absorb moisture - thus eliminating collapse. Special ribbing in the bottom prevents melting ice water from making contact with your product. TempTrust expanded polystyrene does not contain CFC's and is recyclable where facilities exist.

LF EPS Part Number	Product ID	Wall Thickness (Inches)	Outer Dimensions (Inches)	Inner Dimensions (Inches)	Volume in In <sup>3</sup>	Volume in Liters	Units Per Bundle

TempTrust EPS Containers are 100% recyclable. Composed of a lightweight rigid cellular plastic, EPS comprises of 90% air bubbles made from reprocessed EPS molding beads. EPS is also packaged in a corrugate or plastic container, allowing the packaging to be reused many times over. This not only lowers the probability of being simply dumped into the waste stream, but lowers it's cost-per-use.

### Mesa Labs, a trusted leader in pharmacy cold chain management since 2002

Since 2002 Infitrak, now Mesa Labs, has designed and developed comprehensive cold-chain solutions that protect a product's integrity and ensures patient and consumer safety. Mesa Labs is the only company with all three areas of compliance-based, temperature controlled services and products: packaging, consulting, and real-time monitoring, This translates into a team that is with you all the way from raw materials to end user. For more information, visit us at [www.temptrust.mesalabs.com](http://www.temptrust.mesalabs.com).
